To,

Premier Eye Clinic,
Dr. Rangarajan.

Dear Dr. Rangarajan,

I got my Lasik Surgery ^{done} really 4 years back. My experience was very good. Before I came to a conclusion to get my eyes operated, the feeling of getting scared was around me. But the time since I contacted Dr. Rangarajan all my worries got over. The surgery was so safe for me. I always wanted to be without glasses or lens as I hated them. It hurted me when people used to say that how come glasses and all and many things.

This operation can be done to everyone without any side effects. I can very firmly suggest this treatment to all my friends and relatives who ever needs it. It is very safe and hardly take minutes. So, all my friends who all have glasses go in for it and see the world without lens as the world is very beautiful outside without them.

Yours kindly,

Roshni
